

Manual Devices

Sauna - *hot hot baby!*

Using the sauna is very easy! All you have to do is **push the on/off button** to turn on the sauna. Then press the **OK button** for a few seconds until you hear a click from the heater in the sauna. From now on, the **automatic program** of the sauna is activated. This program lasts for 2 hours and stops automatically. It takes about **45 minutes** until the sauna reaches the temperature. The temperature is automatically set at 80 degrees. If you would like the temperature to be higher, you can adjust this easily. Press the third button on the top right to increase the temperature. With the + and - you can adjust the temperature. To adjust the duration, you can also do this the same way. For hygienic reasons, please always sit on the **provided sauna towels** in the sauna. Do not forget to **turn off the sauna after use**. See illustration on page 2. **Enjoy!**

Bath - *deep clean!*

The unique [PURO2 hydrotherapy bath](#) will blow your mind. To bring oxygen deep into your skin, PURO2 uses a patented process: the production of billions of microscopic air bubbles enriched with oxygen. These are so small, they can penetrate places that other cosmetic treatments can't reach. Deep in your skin, they create a connection with the impurities that are there, and then drain them away. This **deep cleansing** makes your skin look fresher and feel softer than ever before. During cleansing, the air bubbles also add **oxygen** to your skin, as PURO2 contains up to 70 percent more oxygen than a regular bath. Those oxygenated bubbles stimulate the natural production of collagen and boost your skin cells. Thus, PURO2 helps reduce **the visible signs of aging** and gives your skin a young and energetic look.

Fill the tub with water, up to the level of the light. Only then press the **right button** ([button A](#)) to turn on the bath. Using the **left button** ([button B](#)) you can activate the lighting. But it can be even more fun! In the bath at the height of the head there are built-in **speakers**. Via bluetooth you can connect the bath with

sea sense

your smartphone. Connect with 'belhydro' via bluetooth and make your bath moment the ultimate relaxation experience! See image on page 2 for the control panels. **ATTENTION: NO SHOWER PRODUCTS (SHAMPOO, CONDITIONER, SHOWER GEL, BATHROOM OR SCRUB) MAY BE USED IN THE BATHTUB. THIS CAN OF COURSE BE DONE IN THE SHOWER.**

Gas fireplace - *fire it up!*

To make your stay in Sea Sense extra cozy, there is a **design gas fireplace**. Via the **remote control** you simultaneously press the two buttons with the arrows on them to switch it on or off. After a few seconds the gas fire will turn on and the flames will appear. Via this link you get an explanation of how the remote control works: <https://www.youtube.com/watch?v=ysLCpZDvpIY>

Winter-tip: turn on the fireplace immediately upon arrival! See image on page 2.

Cooktop - *let's cook!*

For your convenience, we have chosen an induction cooktop. This is user-friendly. **Important! You should always place a cooking pot or pan on the plate before lighting the indicated cooking surface.**

Do you have a question or is there something unclear, then you can always contact us by phone or mail:
